**Report Overview:** This publication on the Status of Women in Lake County is part of a statewide publication of the Tennessee Economic Council on Women, *The Status of Women in Tennessee Counties, 2004*. The Economic Council on Women is a State agency created under TCA § 4-50-100, et seq. by the One Hundredth General Assembly in 1998 to address the economic needs of Tennessee women.

# The Status of Women in Tennessee Counties

## LAKE

Women have taken remarkable strides towards economic equality, from education to earnings to political participation. Women are now pursuing goals such as business ownership, leadership roles in their careers, and election to state and federal political office. However, obstacles still exist in the climb toward equality. Nationwide, equal numbers of men and women are obtaining four-year college degrees; however, these gains have not translated into pay equity. The average college-educated woman working full time earns \$44,200 a year compared to \$61,800 for men in the same category. Women are still under-represented in many of the highest paying, fastest growing sectors of the economy. Helping women break into these traditionally male-dominated areas like computer science, engineering, mathematics and technology, as well as all skilled-labor positions, gives women tools for self-sufficiency and understanding of their personal capabilities, and these advances are good for the economy of our counties and of our state.

### Employment and Earnings

The employment and earnings index includes data on women's annual earnings, the earnings gender gap, female labor force participation rate, the female unemployment rate, and the percent of women in managerial or professional occupations.

- ◇ Lake County women have median annual earnings of \$18,700, about \$7,000 less than men working during the same fiscal year.
- ◇ Lake County ranks in the last five counties in the unemployment indicator with a rate for women at 9.9%. The overall county unemployment rate is 8.6%.
- ◇ Women represent only 39.8% of the county population but they make up 50.4% of the county labor force.
- ◇ Lake County has a high percentage of employed women working in managerial and professional occupations 37.9%. Lake ranks third among counties for this indicator. Only 17.0% of all employed persons in the county work in management or in professional jobs.

### Economic Autonomy

The economic autonomy index includes information on educational attainment, business ownership and general quality of life issues.

- ◇ Lake ranks in the bottom three counties in five of the economic autonomy indicators: businesses that are women-owned (95<sup>th</sup>), women with a four-year college degree (94<sup>th</sup>), women earning below the poverty level (93<sup>rd</sup>), single, female-headed households living in poverty (95<sup>th</sup>), and adolescent pregnancy rate (94<sup>th</sup>).
- ◇ Higher percentages of women than men have high school diplomas and bachelor's degrees in this county. However, only 5.8% of women have at least a bachelor's degree, ranking Lake next to last among all counties.
- ◇ 26.7% of women in Lake County earn incomes below the poverty level.
- ◇ Though 19.9% of families live in poverty in the county, the percentage rises to 48.2% for families with a female householder and no husband present.
- ◇ In Lake County women represent 38.0% of eligible voters and about 30 percent of elected county officials are women.
- ◇ Lake ranks last among counties in percentage of businesses that are owned by women, with a negligible percentage of female-owned businesses.

# ABOUT THE COUNCIL AND THIS REPORT

Lake County

*The Status of Women in Tennessee Counties* report offers an economic profile of women in each county of Tennessee and examines how women's rights and equality vary among the counties. The report presents data and overall rankings in two categories of women's economic status: employment and earnings and economic autonomy. Indicators of women's status in each category make up the composite rankings of the counties.

The employment and earnings section presents data on women's annual earnings, the earnings gender gap, female labor force participation rate, the female unemployment rate, and the percentage of women in managerial occupations.

The economic autonomy section includes information on the percentage of businesses owned by women, educational attainment levels, percentage of households headed by a single female, single female headed households living in poverty, percentage of women with health insurance, the high school dropout rate and the teen pregnancy rate.

The **Tennessee Economic Council on Women** was created in 1998 by the Tennessee General Assembly to assess Tennessee women's economic status. The Council develops and advocates solutions to address women's needs in order to help women achieve economic autonomy. In setting its priorities, the Council selects issues that are timely and likely to result in positive changes for women.
